

SOLIDARITE CAMP 15

The conditions of roads in the community of Masina are deplorable. There is an important road located just behind the large market that was badly eroded road. Heavy rains completely washed out the road and uncovered the main water line into the community. The exposed pipe became a serious obstacle to small vehicles entering the community.

The community received a \$2,500 grant from the Ambassador's Special Self Help Fund which they used to fill washouts with sand bags. They also reconstructed a section of the road using rock and dirt. The erosion has now stopped due to the grant and a great deal of physical labor and effort put in by the community.
